CAREER OBJECTIVE

Aspiring Web Developer & Data Scientist, skilled in building responsive websites and analyzing data-driven insights. Seeking opportunities to apply technical expertise, learn industry practices, and contribute to innovative digital solutions.

WORK EXPERIENCE

Web Development • Internship

Apr 2025 - Jun 2025

Wayeva Innovations, Virtual

Built and optimized responsive websites using HTML, CSS, JavaScript, and frameworks. Collaborated with designers to deliver intuitive, user-friendly interfaces. Integrated APIs and implemented performance improvements for better functionality.

Senior Barista

Nov 2023 - Present

The Windmill Coffee House And Bistro, Navi Mumbai

Prepare and serve a wide range of beverages with consistency and quality. Supervise daily café operations and guide junior baristas. Train team members on customer service, brewing techniques, and hygiene standards. Ensure inventory management, stock ordering, and cost control. Deliver exceptional customer experience through personalized service.

EDUCATION

Master of Computer Applications (MCA),

2025 - 2027

Manipal University Jaipur

Bachelor of Computer Applications (BCA), CS/IT

2022 - 2025

CSMU

TRAININGS / CERTIFICATIONS

Python

Mar 2022 - Jun 2022

Merit-tech Computer Institute, Navi Mumbai

Successfully completed Python programming, learning to write efficient code, automate tasks, work with data, and build projects using core concepts, OOP, and popular libraries for real-world problem-solving.

C Programming & C ++ Programming

Jan 2022 - Mar 2022

Merit-tech Computer Institute, Navi Mumbai

Completed training in C and C++ with practical exposure to structured and object-oriented programming. Learned variables, loops, functions, arrays, pointers, classes, objects, and file handling, strengthening logic and coding skills.

PROJECTS

[NaviRide – Tracking and Ticket Booking App ↗](#)

Jan 2025 - Apr 2025

NaviRide is a web-based public transport application designed to make bus travel in Navi Mumbai easier and more efficient. I developed this project using Node.js, Express, MongoDB, and React, working on both the frontend and backend. The app allows users to track buses in real time, check routes, and book tickets directly online. I created and integrated APIs for live location updates, route management, and seat availability, ensuring smooth and accurate performance. The admin dashboard helps manage bus schedules, fares, and ticket records efficiently. I also focused on creating a responsive, user-friendly interface that works well on both mobile and desktop devices. The project highlights my ability to design, develop, and deploy full-stack applications with real-world usability. Hosted on Netlify, NaviRide showcases my skills in problem-solving, API integration, and building scalable web systems for smarter urban mobility.

[Tashitech ↗](#)

Jan 2025 - Feb 2025

I built the official website for Tashi Tech, an IT services company that provides web development, mobile apps, and digital marketing solutions. I designed and developed the entire site from scratch using React, Node.js, Express.js, and MongoDB, creating a responsive, modern, and user-friendly interface. The site includes dynamic service pages, a portfolio section, and contact forms, all optimized for performance and SEO. On the backend, I implemented data handling, form submissions, and content management to make the site scalable and easy to maintain. I also handled deployment on Netlify and cloud services, ensuring the website runs smoothly. This project highlights my skills in full-stack development, UI/UX design, and building real-world web solutions that reflect a professional brand.

SKILLS

- HTML&CSS
- JavaScript
- C++ Programming
- SQL
- Java
- Data Analytics
- Python
- C Programming
- Data Science

EXTRA CURRICULAR ACTIVITIES

- Actively participated in a robotics workshop, gaining practical experience in robot building and programming, while coordinating sessions, assisting participants, and ensuring smooth execution of all workshop activities.
